

Swachata hi seva

On 20th sep 2019, as a part of 'Swachata hi seva' activity students of SVIS initiated a cleanliness drive to clean their school and immediate surroundings of plastic wastes. Students of Std 8th rallied around and talked about the harmful effects of plastics on the environment thereby spreading awareness about the harmful effects of plastics.

They made slogans on chart papers about the right way to dispose plastic waste and also exhibited the 4 'R's.

A special discussion session was organised by the science teachers and class 7th about alternatives to plastics. The students were very motivated and resolved to use only biodegradable things and no plastic items.
